TO WHOM IT MAY CONCERN

Globally Green Energy Consortium (GGEC) a non-profit organization with worldwide independent laboratories facilities, herewith awards IceCOLD® Platinum Certification for 2008. The performance evaluation of IceCOLD® was conducted at one of GGEC affiliated independent laboratories on numerous name brand Air Conditioning and Refrigeration systems using R22, R717, R410a, R134a and R404a refrigerants. Air Conditioning and Refrigeration systems used for the evaluation included Roof Top Units (RTU), Package Terminal Air Conditioner (PTAC), Split Systems, Chillers, Bus and Refrigerated Reefer Truck units. The test results showed that the power consumption of systems treated with IceCOLD® was reduced by at minimum 16% and maximum 25% as outlined in the list below:

- R22 PTAC = 20%
- R717 ammonia = 15%
- R22 RTU = 19%
- R410a RTU = 18%
- R410a DX split system = 18%
- R134a chiller = 18%
- R22 chiller = 16%
- R410a chiller = 17%
- R404 truck reefer refrigeration = 21%
- R134a bus = 25%

For details on test results please contact GGEC- Product Certification Department at productcertsvcs@ggrec.org or call 888-613-5554.
